

FAMILY TREE DESIGN

Family trees are complex. Designing a calligraphed tree demands clarity and organising your information can be a challenge. How much information will you include? What is the function of the tree? Is it a unique piece or will it be copied for other family members? Will you include illustration? Rather than creating a framed piece, perhaps a book structure would be appropriate. There are a great many layout decisions to be made but there are tricks which will save space where needed. All possible decisions will be explored as you work on your tree. Tuition will either be face to face or online.
