

1. Modern pointed pen cursive minuscule and capitals

This script has figured widely on the calligraphy scene, especially on social media, in recent years. Based on the more exacting copperplate, it has many uses especially in graphic design contexts such as wedding stationery. This script encourages rhythm and flow in calligraphy and gives plenty of opportunity for personal script variations. Both basic and experimental versions can be covered in this tuition, as required. One-to-one zoom tuition is recommended but there are also other possibilities if preferred. Zoom video with tutor-led demonstrations and student practice, supplied after each session, with tutor demo sheets scanned by e-mail.
