

Quills and Vellum

Writing with a carefully prepared and cut quill on beautiful vellum is a joy. But many people are daunted by the technicalities of making quills and scared of the process of preparing and using vellum. This course can help overcome those fears and will use videos and demonstrations alongside individual advice and help over a series of lessons, the number of which will depend on the needs and skills of the students. These lessons can be provided either as one-to-one sessions or for small groups of people. Supplementary material will be provided as digital or physical documents and will include a copy of my booklet Quills & Vellum.

My experience as a scribe working on the Saint John's Bible for nearly six years has been invaluable in my understanding of using quills and vellum.

You are welcome to contact me to discuss tuition.
